1/2T

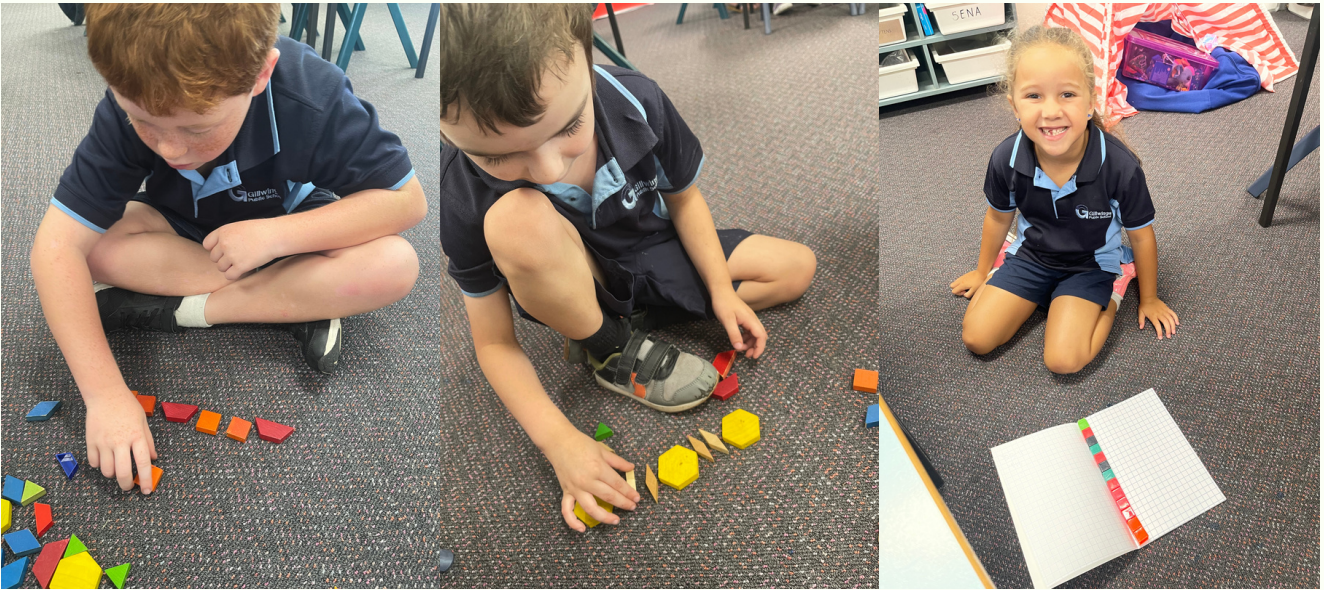

CLASSROOM CORNER

SEE WHAT WE HAVE BEEN LEARNING IN
1/2F

In 1/2T this term, we have been learning about a lot of different topics in maths. First, we learnt about patterns, and created our own shape and number patterns.

Next, we started learning about measurement. We measured many different objects using informal measurements and formal units. We had lots of fun using different materials to explore different topics in maths.

This term we have also been enjoying buddy reading with 5/6W each week. It has been lovely making new friends and spending time in the library reading books with our new senior friends. In week 6, they kindly showed us around their classroom and taught us how to play different types of games.
